

Jobfit Testimonial

for

Business Technology Partners Pty Ltd

May 2013

Early in 2013, Jobfit, with the assistance of BTP completed a full overhaul of its core IT infrastructure located in the SA based data centre. This project was completed by well trained, motivated BTP engineers in conjunction with internal IT&C staff employed by Jobfit. Leveraging both supplier and vendor expertise to ensure the final outcome was of a high standard whilst incorporating both, best practices and industry standards for both hardware and software.

The Jobfit network upgrade was completed to meet or exceed the following key deliverables and was carried out seamlessly with the highest level of professionalism, dedication and commitment to the end goal.

- Provide additional network resources to accommodate additional users and locations
- Provide compliance to software licensing for all applications/services
- Provide higher reliability, stability and redundancy for core infrastructure
- Provide improved disaster recovery processes and backup management
- Provide more elasticity to IT requirements and reduce over expenditure
- Provide the use of current technologies whilst allowing future flexibility to cater for business demands.

The network server infrastructure, following completion, was built to cater for previous business acquisitions with vast consideration being made to future business planning to ensure a long term investment with the final design.

With a total project cost at almost \$400,000 the team at BTP have been able to provide a complete IT business solution for Jobfit's national operations that has met or exceeded the key deliverables. The final solution of a stable, reliable data centre solution was also completed within tight time frames and overall under budget requirements.

The team at BTP always provide prompt IT sales and service and are dedicated to assisting their clients in achieving their IT goals. BTP's range of expertise are highly regarded and would be recommended to all business both small and large or to any organisation that simply have a need to engage a quality trusted SA based IT consulting firm that can also assist with other IT related products and services such as telecommunications, cloud technologies and photographic equipment.
