

What's New?

Test and Tag

Our senior technician Brian Uptis has recently completed a nationally recognised Test and Tag training course and is all geared up to do your site.

Just what is test and tag?

Test and tagging is a generic name given to the process of visually inspecting and electrically testing in-service electrical equipment for personal safety.

In some situations this is mandated. In some industries it is a requirement. In many insurance claims, the records to prove tagging was completed are required.

Contact us to book Brian in.

Microsoft News

Microsoft ended their support for Windows XP, Office 2003 and SBS 2003 in April 2014. We have noticed an increasing amount of websites no longer work in IE8 and if you are using Windows XP you are limited in what you can do.

If you have these products it is time to talk to us about how it may affect you and your business.

We have already talked with many businesses and setup a roadmap to move onto new products. Every situation is different and not everyone will need to upgrade. Let's talk about your business and what your options are.

New look BTP team

From left to right. Michael Jenkin, Johnny Landherr, Michael Banjac, Alex Turner, Brian Uptis and Raymond Jiun Yee Chin.

Check out our new look. No mistaking the BTP team when we are at your site.

The new look has proved popular and we have had many great comments.

Management Changes

Johnny Landherr has joined the management at Business Technology Partners. Johnny's new role is officially Operations Manager.

Apart from running the day to day operations of BTP Johnny is still a part of the Telecommunications team assisting Brian and can be contacted about anything to do with Samsung phone systems.

Michael Jenkin has stepped up to Managing Director and is still heavily involved with the day to day IT problem solving as well as working on improving the business.

Sam Webster left an active role in BTP over 12 months ago, due to ill health. He retains a tight relationship with the business but presently has other priorities.

Email signatures

Have you noticed our changing email signatures? Every email that gets replied to gets an alternative email signature message in the response.

Would you like to do this for your clients? Do you have something to say?

BTP can provide you with the tools from Exclaimer to do this. We can install, configure and help you with your signatures.

This gives you ultimate control over your email signatures from all staff.

BTP Online Store

BTP has an Online store accessible through our web link <http://store.btponline.com.au/store> where you can buy online services. In addition we are Telstra T-Suite partners and can offer Microsoft 365 solutions.

Using our store you can purchase

- *Hosted email systems*
- *Website domains*
- *Hosted servers*
- *Web certificates*

New from Trend Micro

Trend Micro sits on many of our client's servers and simply does its job. Everyone forgets it is there, protecting them from viruses and malware daily. As it does not break and it not forefront of mind, many servers are using the older version.

Trend Micro Worry Free 9 is out. It supports Windows 8, it is faster, it uses less of your systems resources and works better.

Call us to talk about an upgrade! If you are a current paid up subscriber, the upgrade software is free.

Partner's Corner

Evercool

Evercool is an Adelaide based Leading company in manufacturing Security Doors and Screens.

They manufacture all types of aluminium screen doors and screens, from your basic fly screen door to your superior stainless steel security door called Crimsafe, This also includes the diamond patterns as well the decorative cast pattern doors. They can even look after pet doors.
